These forward-looking statements are based on the current views of the Trustee-Manager and the Trust concerning future events, and necessarily involve risks, uncertainties and assumptions. These statements can be recognised by the use of words such as “expects”, “plans”, “will”, “estimates”, “projects”, “intends” or words of similar meaning. Actual future performance could differ materially from these forward-looking statements, and you are cautioned not to place any undue reliance on these forward-looking statements. The Trustee-Manager does not assume any responsibility to amend, modify or revise any forward-looking statements, on the basis of any subsequent developments, information or events, or otherwise, subject to compliance with all applicable laws and regulations and/or the rules of the Singapore Exchange Securities Trading Limited (the “**SGX-ST**”) and/or any other regulatory or supervisory body or agency.

EBITDA is a non-SFRS financial measure and represents operating profit before depreciation and amortisation expense, net finance costs and income tax expense. EBITDA and EBITDA margin are supplemental financial measures of the NetLink Group’s performance and liquidity, and are not required by, or presented in accordance with SFRS, IFRS, Singapore Financial Reporting Standards (International), U.S. GAAP or any other generally accepted accounting principles. Furthermore, EBITDA and EBITDA margin are not measures of financial performance or liquidity, and should not be considered as alternatives to net income, operating income or any other performance measures derived in accordance with SFRS, IFRS, Singapore Financial Reporting Standards (International), U.S. GAAP or any other generally accepted accounting principles.

Fibre is 'future proof'

#1

PREFERRED

Only means of fixed broadband delivery in Singapore

HIGH PENETRATION

Over 90% residential penetration rate

LOW PRICES

Fibre broadband prices are lower in Singapore than many other countries

CRITICAL INFRASTRUCTURE

Fibre supports last-mile wireless access solutions such as WiFi hotspots and 4G/5G mobile base stations

SCALABLE

Fibre capacity is highly scalable and can support future transmission technologies

Our network

NETLINK'S NETWORK CONNECTS THE CENTRAL OFFICES TO:

RESIDENTIAL HOMES

NON-RESIDENTIAL PREMISES

NBAP LOCATIONS

NLT Central Office

HDB / High Rise Residential Apartment

1,446,784 End-Users

Landed Residential Area

FY21 Profit & loss statement

S\$'000	FY21	FY20	Variance (%)
Revenue	368,466	370,192	(0.5)
EBITDA	270,237	258,425	4.6
EBITDA margin (%)	73.3	69.8	3.5 pp
Depreciation & amortisation	(167,792)	(167,782)	-
Net finance charges	(10,803)	(18,774)	(42.5)
Profit before tax	91,642	71,869	27.5

Revenue for FY21 was marginally lower by 0.5% mainly due to lower installation-related, diversion and ducts & manholes service revenue. This was partially offset by higher residential, NBAP and segment connections revenue.

EBITDA increased 4.6% due mainly to the lower write-off of project costs in relation to a discontinued IT project as compared to amount written off in FY20; government grants; lower operation & maintenance costs; and lower installation costs. The write-off of the project costs had no cashflow impact in FY21.

Our focus for FY22

01 RESIDENTIAL

- Improve take-ups from first time fibre users
- Connect low-income households via initiatives such as IMDA's Home Access programme
- Connect new homes
- Improve service provisioning QoS

02 NON-RESIDENTIAL, NBAP & SEGMENT

- Continue improving network capacity, flexibility and resilience
- Customised offerings for projects
- Support 5G roll-outs
- Improve take-ups at major Data Centres

03 POTENTIAL NEW INVESTMENTS

- Explore opportunities to invest in telecoms infrastructure businesses which are likely to generate a stable cashflow.

Thank You

Supplemental Business Information

NetLink Trust's pricing for its services

Pricing of NLT's principal services are regulated by IMDA

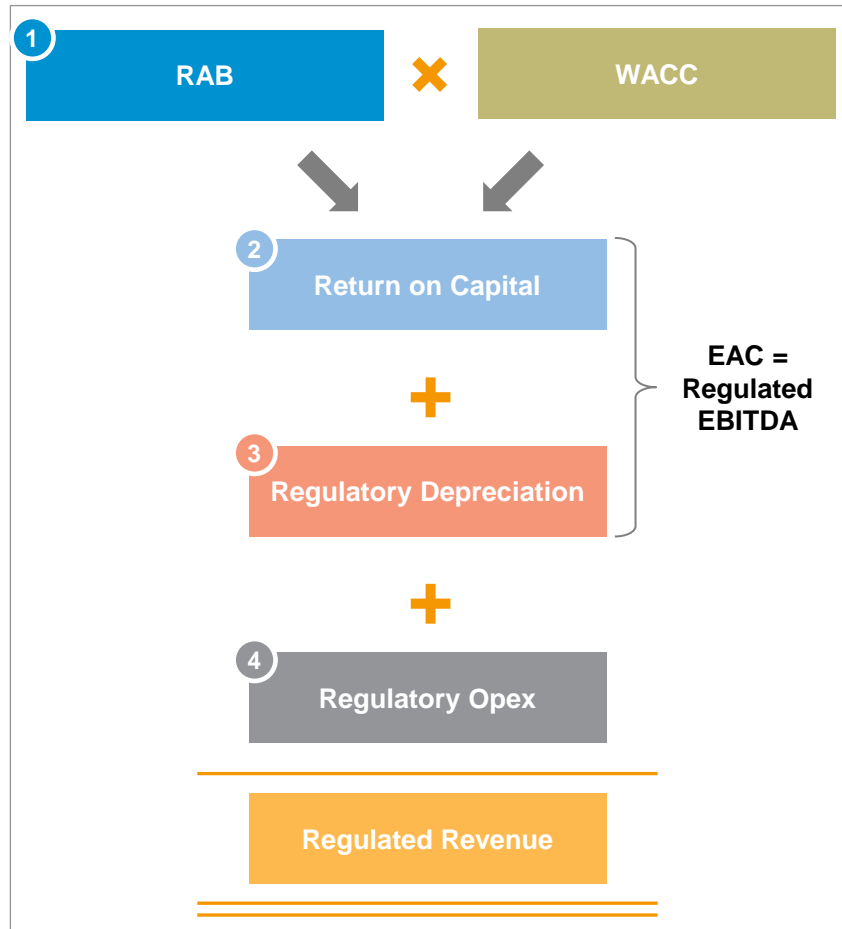

- IMDA shall hold a review of pricing terms every five years following the last price review, or at any such time as IMDA may consider appropriate (which may include a mid-term review in the third year from the last price review)
 - The most recent review by IMDA of prices under the Interconnection Offer and Reference Access Offer was completed in May 2017 and substantially most of the revised prices will be effective from or around Jan 2018 to Dec 2022
 - Pricing terms are regulated using the regulatory asset base (RAB) framework, which allows NLT to recover the following components: (a) return of capital deployed (i.e. depreciation); (b) return on capital employed; and (c) operating expenditure
- NLT may propose to conduct a mid-term adjustment in the third year, in the event of any significant change in cost inputs or if any significant changes to cost or demand forecasts are required due to unforeseen circumstances

Monthly recurring charge (MRC) for fibre connections

Residential	S\$13.80 per connection per month
Non-residential	S\$55 per connection per month
NBAP	S\$73.80 per connection per month

NetLink Trust's pricing for its services

Framework for RAB Based Pricing Model

Methodology for RAB based pricing model

1. IMDA may change the rate of applicable pre-tax WACC in future review period

Understanding the ICO pricing framework

Illustrative Worked Example

How Does EAC Work for 1 Year's Outflow on Capex?

Assuming Opening RAB of S\$1Bn, WACC of 7.0% and Asset Useful Life of 10 Years

Incremental Capex Leads to Incremental EAC

Assuming Opening RAB of S\$1Bn, capex of S\$300MM in Year 1 and capex of S\$200MM in Year 2

The annuity method of depreciation provides an Equivalent Annual Cost which equates to regulatory depreciation (depreciation component) + return on capital (interest component)
